-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 27-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shanok et al. US #3,675,355.

3. Shanok et al. teach providing an image to be viewed (the letter E) whereby the image has first, second and third orthogonal directions (Figure 1), reconfiguring the image to a planar image (when the image is printed on the paper in the Figures) whereby the first and second orthogonal directions (the x and y axes of the letter) form an angle of less than 90 degrees (as shown by the corner at the top, left of the letter) and the second and third (z axis, into the letter) orthogonal directions form an angle of greater than 90 degrees, all as seen when printed on the page. The image comprises a primary figurative element (the face of the letter) and a secondary figurative element (the depth of the letter).

4. Shanok et al. do not specifically teach placing the image at a given angle with respect to a viewer, however the sign is intended to be seen by viewers. Therefore, it would have been obvious to one of ordinary skill in the art to place the sign where it would most likely and most easily be seen by the intended viewers.

5. Regarding claim 28: the secondary figurative element is shown in relief.

Art Unit: 3611

6. Regarding claim 29, the background of the page presents a tertiary element.
7. Regarding claim 30, the first and second angles are less than 90 degrees.
8. Regarding claim 31, the image is made of curable ink (ink on paper).
9. Regarding claim 31, printing on a carrying medium (such as a stamp) that is then laid on a print carrier (such as paper) is old and well known in the art of printing.
10. Regarding claim 33, a ground surface is considered to be an equivalent alternative to the paper surface shown by Shanok et al.
11. Regarding claim 34, the paper of Shanok et al. is considered to be a vertical surface when held upright.

Response to Arguments

12. Applicant's arguments with respect to claims 27-34 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 3249994 and 4450640 also show three dimensional images that have been reconfigured to be planar images.
